Subject: A large gift for Birgit.

A Australian Labradoodle for our Birgit in Norway.

Because we have a child, a little boy of 2 years old, that is allergic for dogs, was it for us not possible to have a dog. We have a little girl of 6 years old with a brain tumour. There is a large chance that she will become blind, she is already blind at one eye.

Her largest wish was a dog. But we thought that it was not possible because our son his allergy.

We heard about the Australian Labradoodles from Rutland Manor, that people with allergy for dogs are heaving no problems with this race and that the Australian Labradoodles are used for guide dog, aid dog and therapy dog for children. Perfect for our little girl and perfect because they are allergy friendly. Therapy dogs are more and more used for sick children because they have a special contact during sickness and treatment. It is fantastic that Rutland Manor is founder and breeder of these dogs.

When Beverley heard about Birgit's illness she offered us a puppy for Birgit to pay no money where we are very gratefully for. We find it a large honour to have a puppy from Rutland Manor. And it is fantastic for Birgit in her situation that Beverley made it possible to make her dream come true.

It is very special that Beverley gives puppies to sick children all over the world. She doesn't have to do that because the waiting list for a Australian Labradoodle from Rutland Manor is long, but people from all over the world think that it is worth waiting, that says enough.

We are very grateful for this large gift, this is for Birgit the best medicine she can get, and Beverley made it possible.

Warm regards from a very grateful family in Norway.

Marieke en Birgit.
