

Pax 4 and half yrs update and request 2nd RM puppy

Our beloved Pax is now 4.5 years old and is my constant companion. I am hearing impaired and Pax lets me know when what's going around me when I cannot hear.

Besides helping me he is and always has been the most wonderful pet and companion. To describe him in a word is POLITE. Of course he is active and friendly, but he has always been careful with other people and things around the house. It is quite amazing actually.

We are now anxiously awaiting our new Rutland doodle. Victoria will be using him in her Psychological practice as she has with Pax often times. Pax has proven to be a great relaxer for Victorias patients and we are sure that the new one will do the same.
